OUTLINE

- Executive Summary
- Introduction
- Methodology
- Results
- Visualization – Charts
- Dashboard
- Discussion
- Findings & Implications

- Conclusion
 - Appendix
-

EXECUTIVE SUMMARY

- Front end language usage is high and will remain high
 - C# usage is high currently, but not in top 10 for the future use
 - Microsoft and AWS platforms are and remain in top

INTRODUCTION

- Purpose: show summary of information regarding Stack Overflow survey

- Target Audience: Stack Overflow users
- Value: Learn valuable information regarding current and future use of
 - Databases, Languages
 - Income and future growth

METHODOLOGY

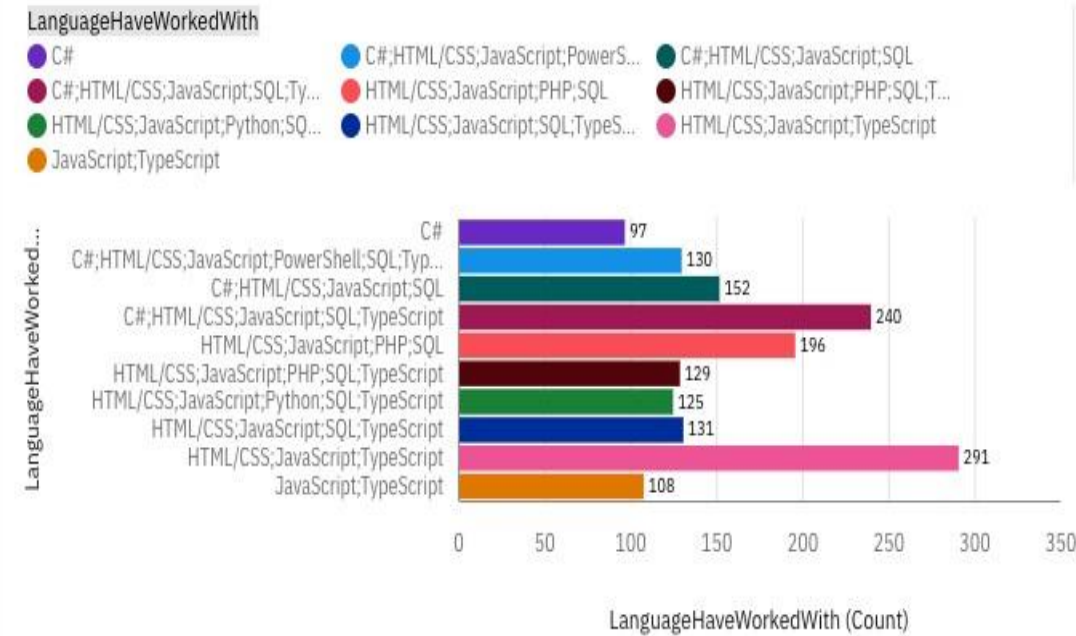

- Data taken from job posting portals, training portals and the annual Stack Overflow survey
- Data was collected using web scraping and the using the data from the Stack Overflow survey
- Data Cleaning
 - Removed duplicates
 - Removed na's
 - Created numeric variables where necessary (for age etc)

PROGRAMMING LANGUAGE TRENDS

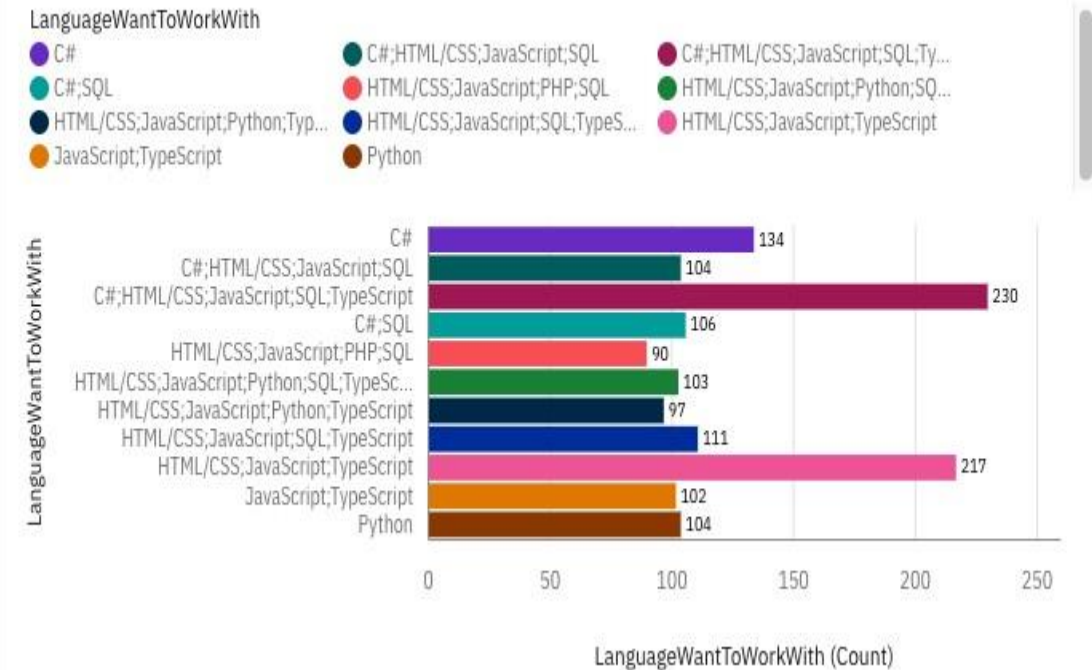

Current Year

Top 10 Languages Worked With

Next Year

Top 10 Languages Want To Work With

PROGRAMMING LANGUAGE TRENDS - FINDINGS &

IMPLICATIONS

- Lots of front end languages in future usage

Findings

- Lots of front end languages used
- Python is in future usage

Implications

- People want to learn python
- Front end languages are high on the current and future usage

DATABASE TRENDS

Current Year Next

Year

Top 10 Databases Have Worked With

Top 10 Databases Want To Work With

DATABASE TRENDS - FINDINGS & IMPLICATIONS

Findings

- Postgre is a standout in both future to be the front runners for usage
- Microsoft is a standout in both

Implications

- Prostgre and Microsoft seem current and
- Other databases might have a need for dbas as interest wanes

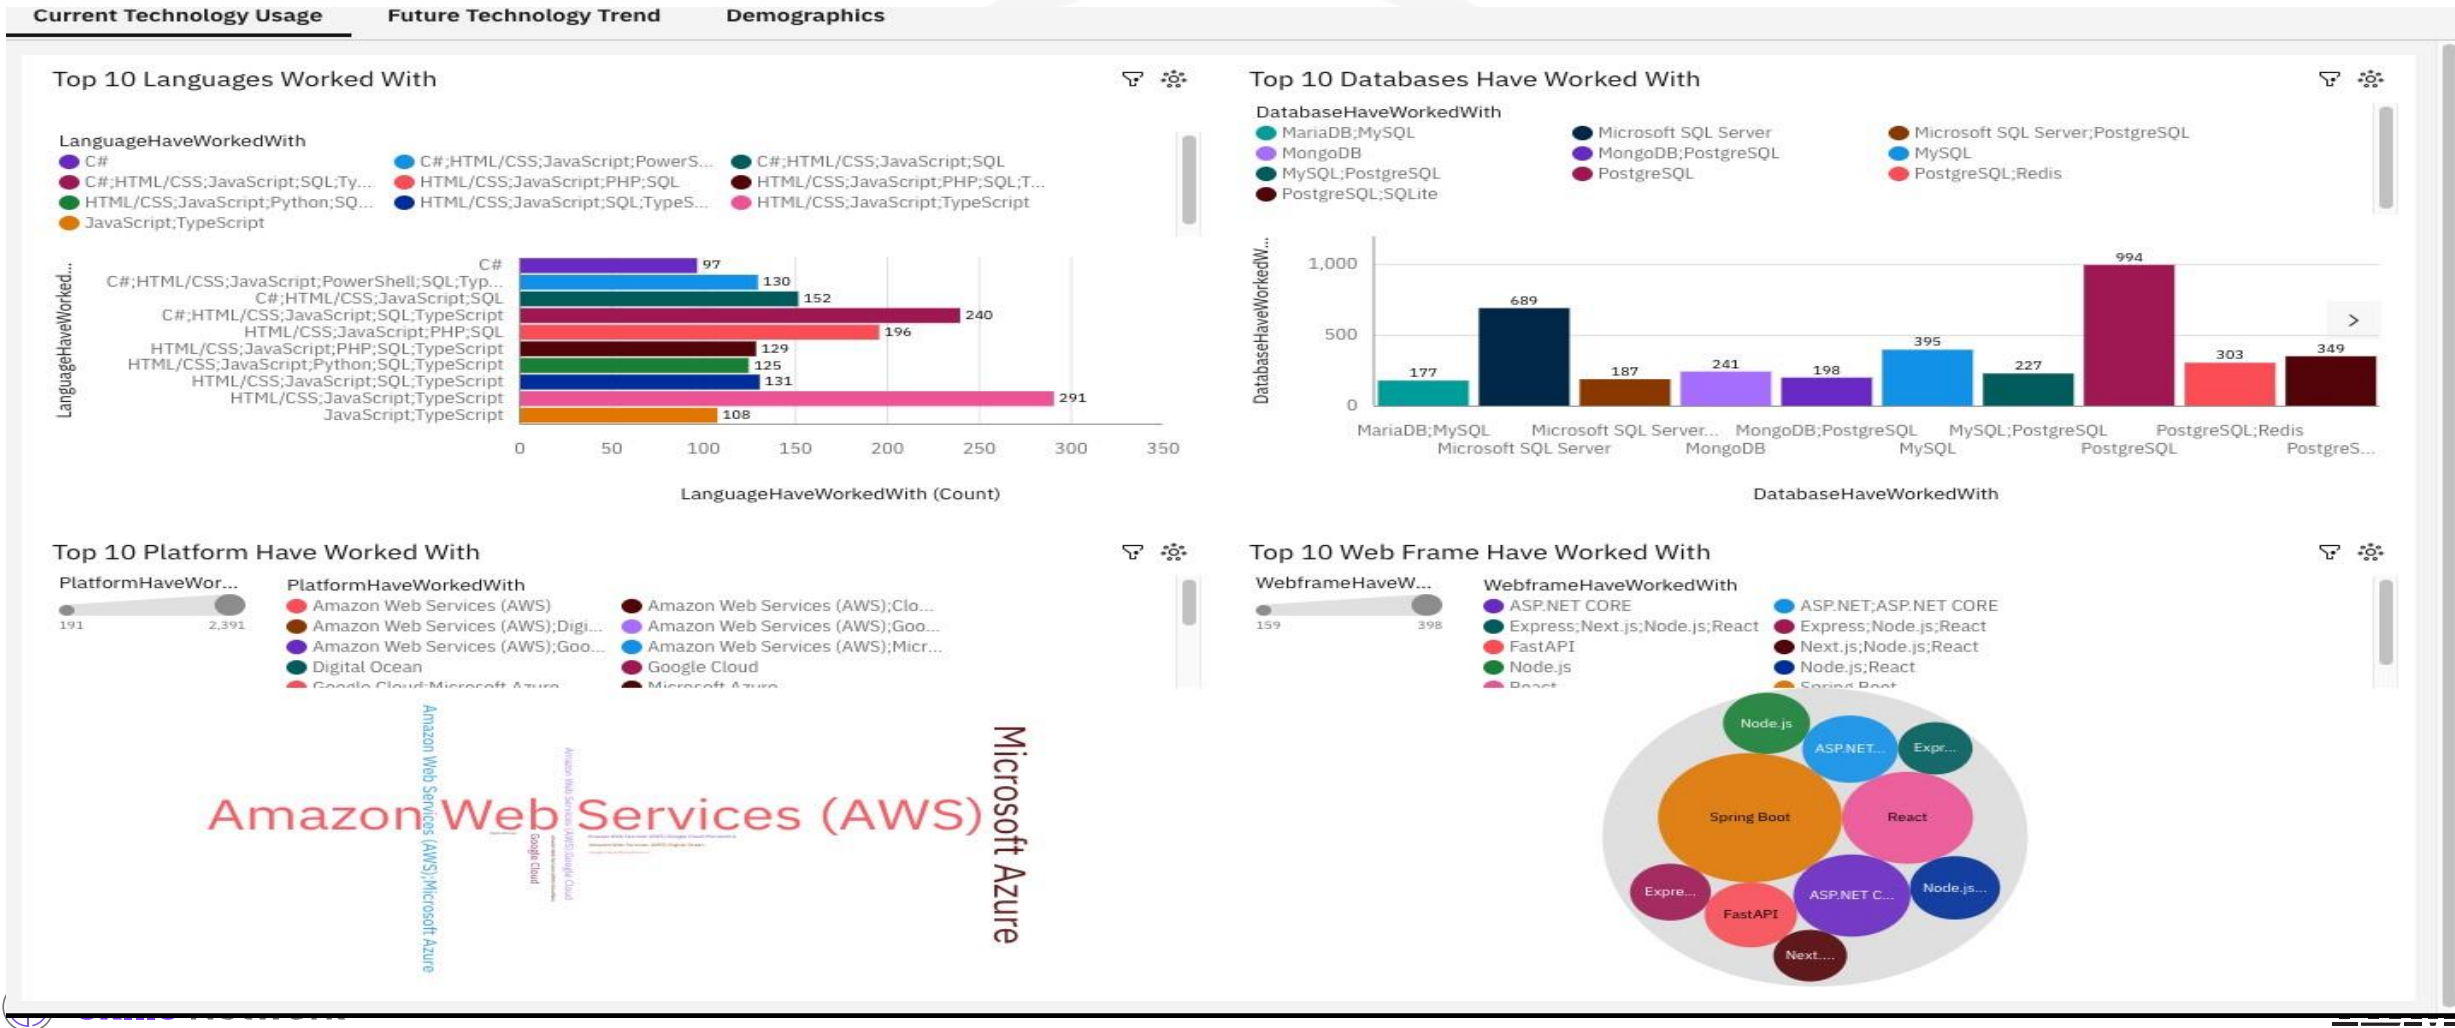

DASHBOARD

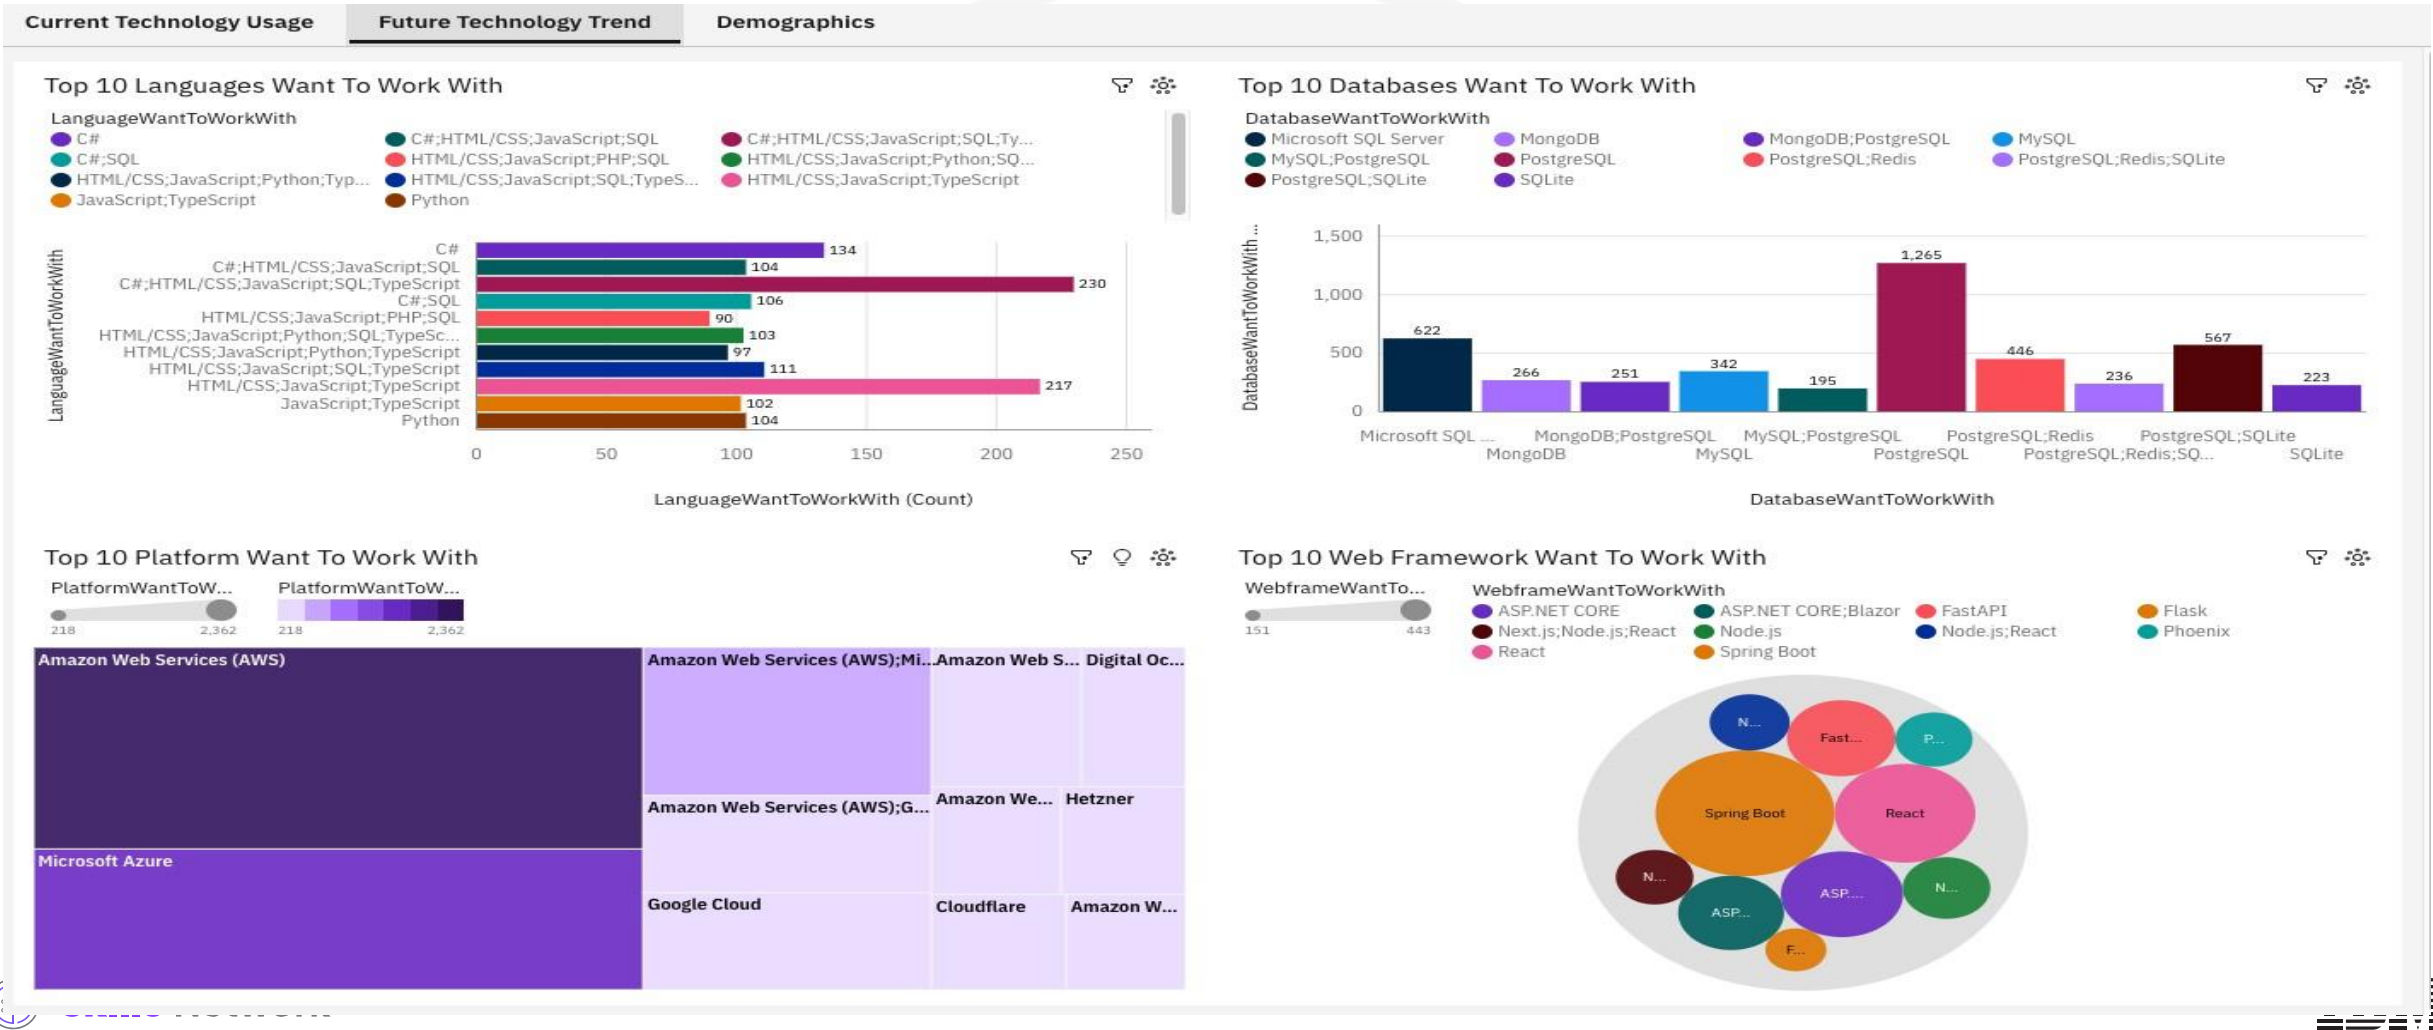

<Please present your dashboard in the following slides.>

DASHBOARD TAB 1

DASHBOARD TAB 2

DASHBOARD TAB 3

Current Technology Usage

Future Technology Trend

Demographics

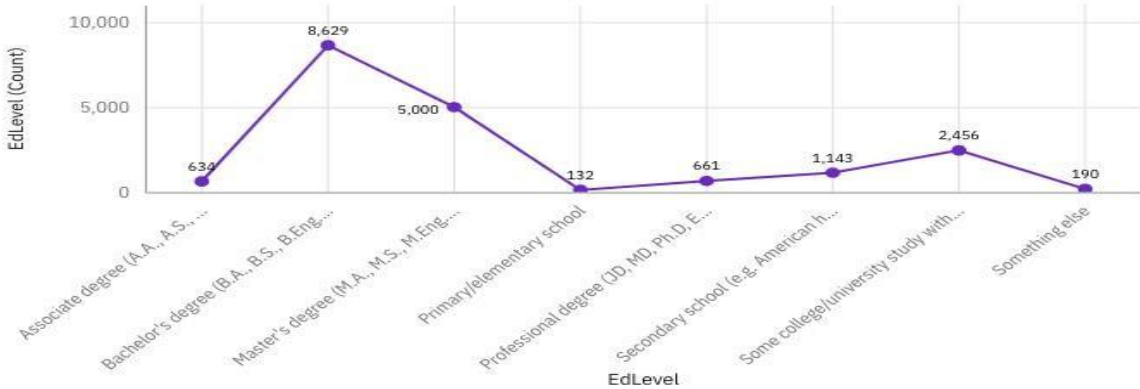

Respondent Distribution by Age

Age

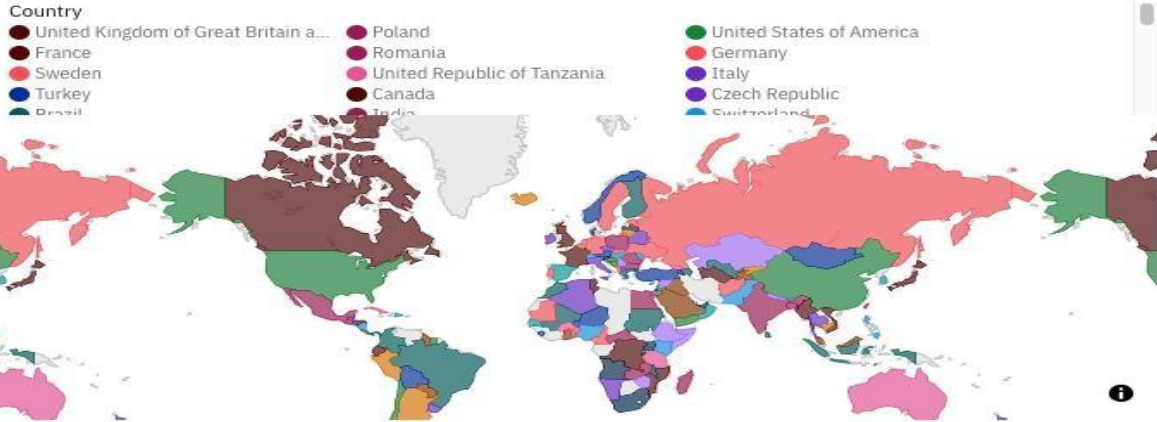

- Prefer not to say
- 18-24 years old
- 65 years or older
- 35-44 years old
- Under 18 years old
- 25-34 years old
- 55-64 years old
- 45-54 years old

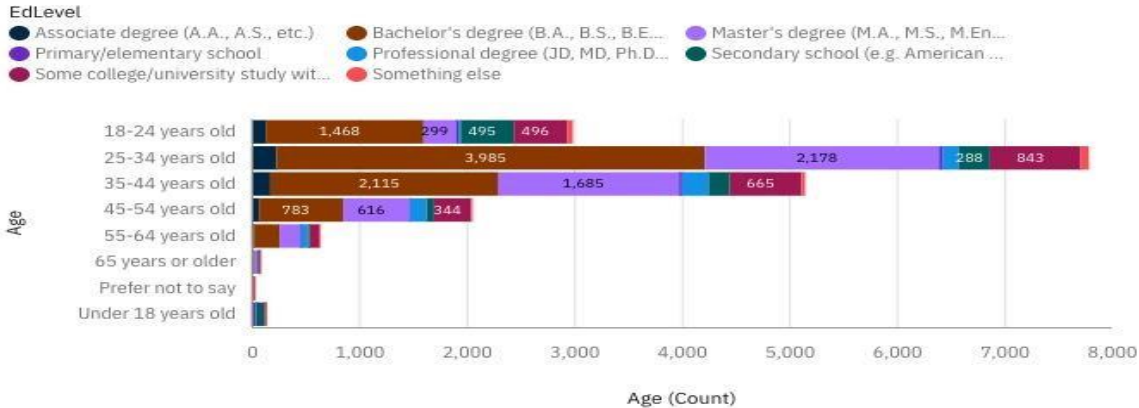

Respondent distribution by Formal Education Level

Respondent Count by Country

Respondent Count by Age, classified by Education Level

DISCUSSION

- A high portion of respondents 25-44 have a Bachelor or higher, so a

higher education
is likely a key to working in programming

- Get comfortable with Microsoft and AWS

OVERALL FINDINGS & IMPLICATIONS

Findings

- Microsoft and AWS have high usage in dbs and platforms

- C seems to be falling out of favor for future use

Implications

- Good idea to learn and get comfortable with Microsoft and AWS products

- While C jobs are advertised most C is not as popular – might want to learn C languages

CONCLUSION

- It seems like Microsoft and AWS are and will remain leaders
- A good education is ideal
- Front end programming languages seem very popular, that might not be the way to go

APPENDIX

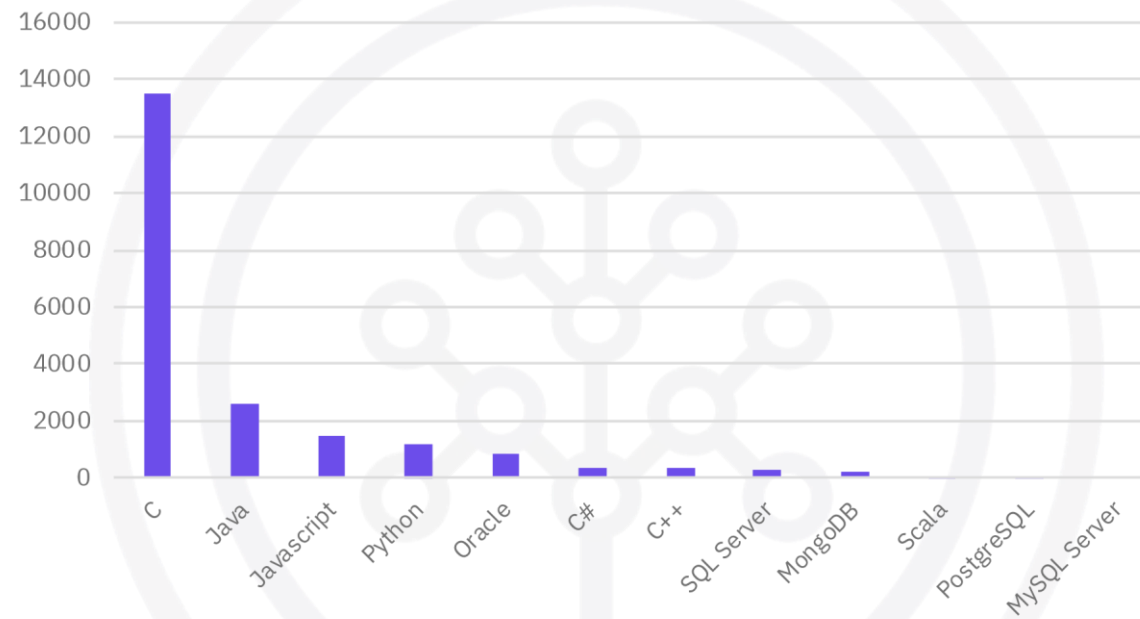

- Include any relevant additional charts, or tables that you may have created during the analysis phase.
